

50 Strategies For Teaching English Language Learners

Introduction: Understanding the Unique Needs of English Language Learners

Teaching English Language Learners (ELLs) is both a rewarding and complex endeavor. These students bring rich cultural backgrounds and diverse linguistic experiences to the classroom, but they also face the challenge of acquiring academic content while simultaneously learning a new language. Effective instruction for ELLs requires more than just good teaching; it demands a deliberate, multifaceted approach that addresses language development, content knowledge, and socio-emotional well-being. To meet these demands, educators can draw from a wide array of research-backed methods. This article presents **50 strategies for teaching English language learners**, organized into ten key areas of instructional practice. Each strategy is designed to be practical, adaptable, and supportive of language acquisition across all proficiency levels. Whether you are a new teacher or a seasoned veteran, these ideas will help you create an inclusive, effective learning environment where ELLs can thrive.

1. Creating a Welcoming and Supportive Classroom Environment

Before any academic learning can occur, ELLs need to feel safe, valued, and respected. A positive classroom climate reduces anxiety and encourages risk-taking, which is essential for language development.

- Learn and use students’ names correctly** – Pronunciation matters; it shows respect for their identity.
- Display diverse cultural materials** – Posters, books, and artifacts from students’ home countries validate their experiences.
- Establish clear routines** – Predictability helps ELLs understand expectations and reduces cognitive load.
- Use nonverbal cues and gestures** – Visual signals support comprehension before words are internalized.
- Assign a buddy or peer mentor** – Pair new ELLs with empathetic classmates who can model language and social norms.
- Celebrate multilingualism** – Encourage students to share words from their first language; post a “word of the day” from different languages.
- Provide a “safe space” for silent periods** – Allow newcomers time to listen and observe without forcing output.
- Use consistent and simple classroom language** – Avoid idioms and slang in directions until students are ready.
- Incorporate movement and brain breaks** – Physical activity lowers stress and boosts engagement for all learners.
- Hold regular check-ins** – Brief one-on-one conversations build trust and allow you to gauge emotional well-being.

2. Building Oral Language and Listening Skills

Oral language is the foundation of literacy. ELLs need ample opportunities to hear and speak English in meaningful contexts. These strategies focus on developing listening comprehension and fluency.

- Use Total Physical Response (TPR)** – Combine commands with physical actions to connect words with meaning.
- Model think-alouds** – Verbalize your thought process while reading or solving problems so students hear academic language.
- Provide sentence frames** – Offer structures like “I think that ___ because ___” to scaffold spoken responses.
- Incorporate choral reading** – Reading aloud together builds confidence and pronunciation.
- Use partner conversations with structured turns** – Time each speaker so both students practice equally.
- Play listening games** – Activities such as “Simon Says” or “I Spy” strengthen auditory discrimination.
- Record and play back student speech** – Let them hear themselves to self-correct and celebrate progress.
- Use songs, chants, and rhymes** – Rhythm and repetition aid memorization of vocabulary and syntax.
- Incorporate podcasts and audio texts** – Provide varied listening sources at different speeds.
- Teach active listening strategies** – Model eye contact, nodding, and asking clarification questions.

3. Developing Vocabulary and Academic Language

Vocabulary knowledge is strongly correlated with reading comprehension and academic success. ELLs benefit from explicit, contextualized instruction in both general and content-specific words.

- Pre-teach key vocabulary before a lesson** – Introduce words with visuals, definitions, and examples.
- Use word walls strategically** – Group words by theme or function, and refer to them often.
- Teach word parts (prefixes, suffixes, roots)** – This empowers students to decode unfamiliar terms.
- Create personal dictionaries** – Students record words with pictures, translations, and sample sentences.
- Use concept mapping and semantic webs** – Visual organization helps students see relationships between words.
- Incorporate cognate instruction** – Point out words that are similar in English and the student’s first language.
- Provide multiple exposures over time** – Revisit vocabulary through games, writing, and discussion.
- Use tiered vocabulary** – Distinguish between basic (tier 1), high-frequency academic (tier 2), and content-specific (tier 3) words.
- Encourage use of bilingual dictionaries and translation apps** – Teach students how to use them responsibly.
- Play vocabulary games** – Bingo, charades, and Pictionary make learning fun and memorable.

4. Supporting Reading Comprehension

Reading in a second language requires explicit instruction in decoding, fluency, and comprehension strategies. Teachers must adapt materials and instruction to ensure access.

- Use leveled texts** – Provide reading materials that match students’ language proficiency, not just grade level.
- Pre-teach background knowledge** – Build schema through videos, pictures, and discussions before reading.
- Model reading strategies** – Demonstrate predicting, questioning, summarizing, and clarifying.
- Use graphic organizers** – Story maps, Venn diagrams, and cause-effect charts help organize information visually.
- Incorporate repeated readings** – Reading a short passage multiple times improves fluency and confidence.
- Provide audio books alongside print** – Listening while reading supports pronunciation and comprehension.
- Teach text structure** – Help students recognize narrative, cause-effect, compare-contrast, and problem-solution patterns.
- Use close reading with scaffolded questions** – Guide students through short, complex passages with teacher support.
- Allow native language texts** – Students can build background knowledge by reading in their first language.
- Encourage buddy reading** – Peer reading partners can provide modeling and immediate feedback.

5. Enhancing Writing Skills

Writing is often the most challenging skill for ELLs. Scaffolding and explicit instruction in the writing process can help students express their ideas more effectively.

- 41. **Use shared writing** – The teacher and students compose a text together, demonstrating decision-making.
- 42. **Provide model texts** – Show examples of different genres (letters, reports, stories) with annotations.
- 43. **Teach the writing process** – Break it into prewriting, drafting, revising, editing, and publishing.
- 44. **Use sentence starters and paragraph frames** – These reduce the cognitive load of starting from scratch.
- 45. **Incorporate journal writing** – Low-stakes writing encourages fluency without fear of grading.
- 46. **Focus on content over grammar initially** – Encourage students to get ideas down first; correct mechanics later.
- 47. **Use peer feedback sessions** – With structured checklists, peers can help identify strengths and areas for improvement.
- 48. **Teach spelling patterns explicitly** – ELLs need direct instruction on English sound-spelling relationships.
- 49. **Publish student work** – Display writing or share digitally to create a sense of pride and audience.
- 50. **Differentiate writing prompts** – Offer choices and varying levels of support so every student can succeed.

6. Incorporating Cooperative Learning and Peer Interaction

Collaborative work provides natural opportunities for ELLs to practice language in a low-stakes setting. Structured group activities promote both social and academic language.

- 51. **Use think-pair-share** – Students think individually, discuss with a partner, then share with the group.
- 52. **Assign group roles** – Roles like “timekeeper,” “recorder,” and “reporter” ensure participation from all.
- 53. **Use jigsaw activities** – Each student becomes an expert on part of a topic and teaches others.
- 54. **Implement numbered heads together** – Groups collaborate on a question; the teacher calls a number to report.
- 55. **Facilitate literature circles** – Small groups read and discuss a common text with defined roles.

7. Differentiating Instruction for Varied Proficiency Levels

ELLs enter classrooms with a wide range of English skills. Effective teachers adjust content, process, and product to meet each student where they are.

- 56. **Use tiered assignments** – Provide similar activities at different levels of linguistic complexity.
- 57. **Offer choice boards** – Students select tasks that match their interests and readiness.
- 58. **Adjust questioning strategies** – Use lower-level questions (yes/no, either/or) for beginners and higher-level questions for advanced.
- 59. **Provide sentence starters for discussions** – Scaffold participation at any level.
- 60. **Use flexible grouping** – Sometimes group ELLs together for targeted instruction; other times mix with native speakers.

8. Integrating Technology and Digital Resources

Technology can be a powerful tool for language learning when used purposefully. It offers individualized practice, authentic resources, and multimodal input.

- 61. **Use speech-to-text tools** – Help students who struggle with writing express ideas orally first.
- 62. **Incorporate language learning apps** – Duolingo, Quizlet, and others provide supplementary practice.
- 63. **Show captioned videos** – Subtitles in English or the native language aid comprehension.
- 64. **Use virtual field trips** – Immersive experiences build background knowledge and vocabulary.
- 65. **Create digital portfolios** – Students track their growth over time through audio and video recordings.

9. Assessment and Feedback for ELLs

Assessment should measure what students know, not just their language skills. Formative assessments and targeted feedback are key to guiding instruction.

- 66. **Use formative assessments frequently** – Quick checks, exit tickets, and thumbs-up/thumbs-down gauge understanding.
- 67. **Assess in multiple modalities** – Provide choices: oral, written, drawing, or performance-based tasks.
- 68. **Offer descriptive feedback** – Focus on what students did well and provide one specific next step.
- 69. **Use rubrics with clear language criteria** – Include categories for vocabulary, structure, and fluency.
- 70. **Allow retakes and revisions** – Learning a language takes time; mastery should be the goal, not
